

CALL FOR PAPERS

Technical Tracks

IEEE Transactions on Emerging Topics in Computing

IEEE Transactions on Emerging Topics in Computing (TETC) seeks original manuscripts for submission under Technical Tracks. In a track the technical contents of a submitted manuscript must be of an emerging nature and fall within the scope and competencies of the Computer Society. Manuscripts not abiding by these specifications will be administratively rejected.

The topics of interest for the Technical Tracks are as follows:

Enterprise Computing Systems
Computational Networks
Hardware and Embedded System Security
Educational Computing
High Performance Computing
Next Generation Wireless Computing Systems
Computer System Security
Emerging Hardware for Computing

Submitted articles must describe original research which is not published or currently under review by other journals or conferences. Extended conference papers should be identified in the submission process and have considerable novel technical content; all submitted manuscripts will be screened using a similarity checker tool. As an author, you are responsible for understanding and adhering to our submission guidelines. You can access them at the IEEE Computer Society web site, www.computer.org. Please thoroughly read these before submitting your manuscript.

Please submit your paper to Manuscript Central at <https://mc.manuscriptcentral.com/tetc-cs> and select the “Technical Track” option in the drop-down menu for “Manuscript Type”.

Please address all other correspondence regarding this Call For Papers to Fabrizio Lombardi, EIC of IEEE TETC, lombardi@ece.neu.edu
