

CALL FOR EDITORIAL PARTECIPATION

Technical Tracks

IEEE Transactions on Emerging Topics in Computing (TETC)

IEEE Transactions on Emerging Topics in Computing (TETC) has seen a rapid growth in its publication activities over its last few years; this growth can now be directed into more specific directions and areas. Therefore, TETC seeks nominations for Associate Editors (AEs) to lead publication activities under the initiative of Technical Tracks; a “Technical Track” encompasses a research area of an emerging technical nature that falls within the scope and competencies of the Computer Society (CS) and is not covered by its existing publication portfolio. A Technical Track will receive regular submissions as well as manuscripts for Special Issues/Sections (SISs) as recommended by its AE to the Editor in Chief (EIC). An AE should have the following desirable qualifications.

1. Senior and established researcher with a world-wide reputation
2. Demonstrated technical and editorial capabilities in the area of the Technical Track
3. Extensive peer-reviewed article publications in the area, as reflected by relevant CS-sponsored periodicals and conference proceedings.
4. Dedicated passion and willingness to serve in a prompt, efficient and inclusive manner to a technical community of professionals.

If you wish to be considered, the following material should be sent in electronic form to the EIC of IEEE TETC.

1. Complete up-to-date resume
2. Proposal of Technical Track (inclusive of description of emerging nature and CS relevance) (no more than 2 pages)
3. Statement of editorial vision and activities to foster the Technical Track (no more than a page).
4. Call-For-Papers (CFPs) for at least 2 SISs on topics related to the proposed Technical Track; please refer to appropriate format and organization as found at the TETC web page <https://mc.manuscriptcentral.com/tetc-cs> for the CFP of planned SISs; these SISs must be executed in the next two years as per the AE appointment.

All applications will be evaluated and successful candidates will be notified by the EIC. Nominations from the EIC will be sent to the Publication Board of the CS for final approval. Please address all correspondence or information regarding this initiative to Dr. Fabrizio Lombardi, EIC of IEEE TETC, lombardi@ece.neu.edu
