IEEE Annals of the History of Computing

Write for Annals

The IEEE Annals of the History of Computing is soliciting manuscripts on all aspects of the history of computing and information. Articles may address technological, cultural, social, economic, industrial, or any other aspects of computing, digital or otherwise. We are interested in original historical analyses, and we welcome interdisciplinary approaches that establish connections between the history of computing and information and its allied fields. Articles are generally published with illustrations.

ARTICLE SUBMISSION GUIDELINES

Send article submissions to IEEE Computer Society’s online manuscript service. Log in at https://mc.manuscriptcentral.com/annals-cs. From there, you can go to the Author Center and upload your submission. The Manuscript Assistant will process your manuscript after it has been uploaded. Once uploaded, you can view it online to check the status at any time.

The IEEE Annals is a peer reviewed publication. Accepted papers will be edited for content and style. A good guideline for articles is 8,000 words or less, including all text, the abstract, keywords, bibliography, biographies, and table text. Each table and figure is counted as 250 words. Article manuscripts are subject to peer review on both technical merit and relevance to Annals’ international readership.

More information about the IEEE Annals of the History of Computing can be found at www.computer.org/annals. Author inquiries may be sent to the editor in chief at annals-eic@computer.org.

DEPARTMENTS

In addition to scholarly articles, we invite submissions to Annals departments. Department submissions include think pieces, anecdotes, reviews, events and sightings, biographies, and interviews. You may find descriptions of each department here: http://history.computer.org/annals/departments. These submissions are typically much shorter than articles and do not go through the Annals peer review process, but instead are reviewed and edited by the relevant department editor. Send submissions directly to the department editors listed below, not through the online submission system.

Think Piece: Bradley Fidler, bradley.reuben.fidler@gmail.com
Anecdotes: David Walden, dave.walden.family@gmail.com
Reviews: Gerardo Con Diaz, condiaz@ucdavis.edu
Events and Sightings: Gerardo Con Diaz, annals-es@computer.org
Biographies: Irina Nikivincze, annals-biographies@computer.org
Interviews: Dag Spicer, annals-interviews@computer.org
