FEATURED ARTICLES

22 Advances in Applications: Portability and Services Interoperability among Multiple Clouds
Beniamino Di Martino, Giuseppina Cretella, and Antonio Esposito

Zahir Tari, Xun Yi, Uthpala S. Premarathne, Peter Bertok, and Ibrahim Khalil

40 Cloud Brokering: Current Practices and Upcoming Challenges
Mateusz Guzek, Alicja Gniewek, Pascal Bouvry, Jedrzej Musial, and Jacek Blazewicz

48 Olympus: The Cloud of Sensors
Igor L. Santos, Luci Pirmez, Flavia C. Delicato, Samee U. Khan, and Albert Y. Zomaya

58 A Cloud Security Assessment System Based on Classifying and Grading
Xuexiu Chen, Chi Chen, Yuan Tao, and Jiankun Hu

68 Principles for Engineering IoT Cloud Systems
Hong-Linh Truong and Schahram Dustdar

What will the future of cloud computing look like? What are some of the issues professionals, practitioners, and researchers need to address when utilizing cloud services? IEEE Cloud Computing magazine serves as a forum for the constantly shifting cloud landscape, bringing you original research, best practices, in-depth analysis, and timely columns from luminaries in the field.
