What will the future of cloud computing look like? What are some of the issues professionals, practitioners, and researchers need to address when utilizing cloud services? IEEE Cloud Computing magazine serves as a forum for the constantly shifting cloud landscape, bringing you original research, best practices, in-depth analysis, and timely columns from luminaries in the field.

**THEME ARTICLES**

26  **Guest Editors’ Introduction: Special Issue on Autonomic Clouds**
Javier Diaz-Montes, Ioan Petri, Omer Rana, and Manish Parashar

30  **Reconfigurable Applications Using GCMScript**
Matías Ibáñez, Cristian Ruz, Ludovic Henrio, and Javier Bustos-Jíménez

40  **Autonomous Cloud Federation for High-Throughput Queries over Voluminous Datasets**
Matthew Malensek, Sangmi Pallickara, and Shrideep Pallickara

50  **Managing Uncertainty in Autonomic Cloud Elasticity Controllers**
Pooyan Jamshidi, Claus Pahl, and Nabor C. Mendonça
