ARTICLES

13 Computer-Aided Design, Drafting, and Documentation—Guest Editor's Introduction
   Frank D. Skinner

15 The Electronics Engineer's Design Station
   R.M. Shectman and D.E. Bering
   A prototype graphics system at Lawrence Livermore National Laboratory takes advantage of menu-driven, interactive techniques to simplify the tasks of electronics designers.

27 Technical Documentation by MAGIC
   John B. Macdonald, Mary K. Podlecki, and Milt J. Pappas
   A multifaceted computer graphics system expedites the production of technical manuals for a large communications network.

38 The Interactive Wiring System
   Frank D. Skinner
   By using directed-beam displays, light pens, and a flexible data base, this interactive in-house tool speeds design time.

55 Selecting and Implementing a Turnkey Graphics System
   Frank W. Bliss and George M. Hyman
   If carefully planned for and managed, turnkey graphics can boost the productivity of design and drafting departments.

75 Line/Polygon Classification: A Study of the Complexity of Geometric Computation
   Robert B. Tilove
   Illuminating the techniques of computational geometry, an analysis of two LPC algorithms compares their efficiency for handling polygon-clipping problems.
