EXECUTIVE DIRECTOR

We are searching for an exceptional individual for a newly created position of executive director of the IEEE Computer Society—the largest professional society in the computer field. In addition to the functional leadership and interpersonal skills required to administer a staff of over 30, the director is expected to work with a broad range of volunteers in our technical/professional society environment.

The Computer Society presently has a world-wide membership of about 60,000 in 90 chapters, and is rapidly growing. It publishes six periodicals and hundreds of conference proceedings/tutorial books, as well as generating various other technical activities supported by hundreds of volunteers and a paid staff located in two offices (Los Alamitos in California and Silver Spring in Maryland).

A minimum of ten years experience, preferably including supervision or administration in computer-related activities, should be coupled with superior administrative and communication skills; a technical background is desirable.

It is anticipated that this position will be based in our suburban Washington, DC, office and that it will require interfacing with IEEE and leaders from industry, government, and academia as well as supervising and supporting a wide variety of services to the membership of the society.

We offer a competitive salary in an exciting and pleasant working environment.

All inquiries will be treated in strict confidence, and all applications received before the end of this calendar year will have a first review by the committee in January 1982. Please send your resume to T. Feng, Chairman of Executive Director Search Committee, IEEE Computer Society, 1604 Stormy Court, Xenia, OH 45385 or call (614) 422-1408 or (614) 422-5813.
