Good news if you're in the market for a graphic computer system that can tackle serious computer aided design applications. It's the Orcatech CAD machine and just look at what you get.

A fully programmable and intelligent graphics workstation developed specifically for high performance CAD applications. Dedicated processing power for each user, supported by a comprehensive software system with full graphics and applications development and fast run time facilities.

Your choice of various computing configurations from stand-alone workstations to host-connected terminals; even clusters in a local area network.

Plus the ability to connect a wide range of peripherals including disks, digitizers, printers and plotters.

So if you are serious about computer aided design and need some good news for a change, then you can now afford to take a closer look at the CAD machine from Orcatech. Call today for complete technical details and a hands-on demonstration.
