Additional reading

Thomas N. Gardner is currently the district sales manager for Adage, Inc., in Dallas, Texas. Previously, he was a sales engineer and application engineer for Adage. From 1972 to 1977 he was employed by Lockheed Electronics at NASA/JSC, where he worked with computer-generated graphics (color raster and monochrome vector) for engineering simulation.

Gardner received a BSEE from Purdue University in 1972 and an MBA from the University of Houston in 1977. He is a member of the Society for Computer Simulation, SID, NCGA, and the Automated Systems Association of the SME.

H. Roice Nelson, Jr., is presently Senior Vice-President of Operations for Landmark Graphics Corporation. From January 1980 to November 1982, he was a senior research scientist at the University of Houston's Seismic Acoustics Laboratory. He has also served as the general manager of the Allied Geophysical Laboratories at the same university. From July 1974 to January 1980, Nelson was with Mobil Exploration and Producing Services, Inc. He also worked for Amoco in the summers of 1970 and 1973.

Nelson's professional interests are related to developing methods and equipment for interactive interpretation of reflection seismic data. He received his BS in geophysics from the University of Utah in 1974 and his MBA from Southern Methodist University in 1981. From 1970 to 1972 he was a missionary for the Church of Jesus Christ of Latter-day Saints. He is a member of SEG, EAEG, and HGS.

New 110° Low Cost Stator Yoke

- Stator core design for quality, repeatability, efficiency.
- Pincushion corrected. Magnet adjustment or trimming not required.
- Thermally efficient (cool), with vented housing.
- Damping provided for circuit/yoke compatibility.
- Beam centering magnet device mounted on CRT neck clamp.
- U.L. approved materials.

Reader Service Number 16

This workshop on an important area of CAD/CAM and robotics focused primarily on industrial applications. Papers and sessions covered such topics as panoramic views of vision, systems for prototyping inspection in lithographic technologies, inspection technologies and applications, 3D vision techniques, and robot vision systems. 238 pp.
