When you compare CIE matrix line printers with others, you'll find others either do a lot less. Or cost a lot more. Or both.

Our CI-300 gives you 300 LPM for data processing and 85 LPM of letter quality. Our CI-600 increases DP to 600 LPM and letter quality to 170 LPM.

Both are plug-in compatible with virtually every type of computer system, including IBM.

Both have variable shuttle speeds.
Both give you graphics, up to 2400 DLPM on the 300 and up to 4800 DLPM on the 600.

Both bring high resolution to Bar Codes, Optical Character Recognition, Form Generation, Labels and Word Processing.

Both have an unusually small print head diameter for needle-sharp character clarity.

Both give you hundreds of unique character fonts. And you have broad customization potential with RAM and EAROM.

Both come with three built-in interfaces, two parallel and one serial.

Both give you flexible line spacing, line feed speed and three paper-loading points—front, bottom and back.

And because they’re designed with a minimum of moving parts and have undergone rigorous testing, both give you unmatched reliability.

They’re printers that could only come from CIE Terminals, a new company of C. Itoh Electronics, one of the most experienced printer companies in the world.

For more information about these low-cost line printers built to higher standards, and more of them, just write or call.
