Acknowledgments

I would like to thank Steve Levine, who provided guidance in the initial development of our functional description. I offer most heartfelt thanks to Eric Nystrom, E. Nicholas Cupery, and Peter Thompson, whose assistance in building this system was invaluable. CRT photography was done by Paul Meyers, of Bartlett Associates, with Dunn camera equipment.

Charles R. Berg is a computer systems specialist for Tower Hill Enterprises, Ltd, of Wilmington, Delaware, a firm he founded in 1981 to offer consulting and systems services in information and communication technology. Berg was employed by E. I. du Pont for seven years, during which time he worked on the Infotrol console and pictorial display software. He also spent one year writing control software for the company’s “aca III,” a human body fluids analyzer for use in hospitals and clinics.

During his undergraduate work in electrical engineering at the University of Missouri-Rolla, Berg was employed as a cooperative engineering student at McDonnell-Douglas Corporation in St. Louis. He has his MSEE from the University of Delaware, where he teaches computer graphics for both the Computer & Information Sciences and the Art departments.

Berg is a member of the IEEE Computer Society and the National Computer Graphics Association; he holds a certificate in systems programming from the Institute for Certification of Computer Professionals.
