13 Guest Editor's Introduction: Computerized Slide Making
Carl Machover

15 The Evolution of Computerized Presentation Graphics at Dicomed
Wayne R. Huelskoetter
With origins in space exploration and earth satellite programs, image-recording technology now makes computer-generated graphics available to almost any organization.

27 Production Volume: The Key to Successful Slide-Making Systems
James Teter and Donna Roberts
Impressed by the dazzling effects that slide-making systems can produce? Who wouldn't be? Before you buy, though, make sure your company can use a system's full capabilities.

33 Designing Effective Business Graphics
Raymond K. Gust
Creating effective presentation graphics doesn’t have to be a difficult task, but you do need to plan ahead—before your system starts cranking out slides.

39 Notes from Left Field: Corporate Slide Presentations
Joan A. Wright
An informal look into the way one company uses a slide-making system shows that machines are nice, but nothing is more important than planning.

47 Computer Slide Making in a Media Services Department
Norma Tanguay Frye
No matter how sophisticated a slide-making system is, an artist’s imagination and vision are still required to create a product of real value to a company.

55 The Slide Business
Thomas W. Hope
The use of slides took a big jump when Kodak introduced the Carousel projector. Will computerized slide-making systems have the same impact on the market?

63 Graphic Design for Computer Graphics
Aaron Marcus
In concentrating on developing the computer’s internal electronic communicative abilities, we have neglected the interface between the machine’s display surface and the human viewer.
