Introducing Ramtek's new 9465 high performance, low-cost deskside colorgraphics and imaging system.

No colorgraphic system provides you higher resolution, greater image control, or more capabilities for the money than Ramtek's new 9465.

If that sounds a lot like a repeat description of the pace-setting, Ramtek 9460 Series, it should. The 9465 is the latest extension of the 9460 concept. It shares the same design approach, is software compatible with the 9460, but adds to it a new compactness and economy.

This deskside system is available in an economical off-the-shelf version or can be user-configured, allowing you to tailor the 9465 to a wide range of applications needs. As an added benefit, the modular design of the 9465 allows for easy on-site upgrades.
