Yu-Ming Azzawi is a systems analyst for WVG Associates, Inc., Torrance, California. He obtained his undergraduate degree from Johns Hopkins University, Baltimore, Maryland, and his graduate degree from Michigan State University. He is currently a member of the IEEE.

Robert S. Howland, in 1977, founded Howland Industries, a contract precision machining company engaged in the manufacture of high-technology products for a number of industries, such as the aerospace, oilfield service equipment, electronic instrumentation, and medical devices industries. Prior to 1977, he was a partner in a similar company for three years and served as vice-president of manufacturing for 12 years at one of the largest contract precision machining companies on the West Coast. Howland has over 35 years of practical experience in the techniques of design, engineering, quality control, and manufacturing, and has also developed considerable expertise in the related business areas of finance and marketing.

Howland served in the Air Force during World War II and attended Loyola University in Los Angeles.

Don L. Hibbard is manager of a manufacturing department with a large aerospace company. He has been a design engineer for the past 20 years, designing all types of special equipment. He is a member of the CASA/SME (Computer & Automated Systems Association, Society of Manufacturing Engineers) and is a registered professional engineer with the State of California.
