You can now update your ADDS, TeleVideo, or Lear Siegler terminal with the most economical Tektronix graphics around!

With our invention, the RG512 Retro-Graphics terminal enhancement, we introduced more than 25,000 operators to the standard of value in Tektronix-compatible graphics.

We'd now like to introduce you to our latest innovation: 512-Series Retro-Graphics. Currently shipping at the industry's newest standard, $749 (quantity one).

The 512-Series. A user-installed PCB assembly that converts your TeleVideo®, ADDS, or Lear Siegler® terminal into a powerful bit-map graphmaker. With Tek™ 4010/4014 features. And compatible with Tek's PLOT® or your RG512-based program.

In fact, Retro-Graphics ensures your software investment. Now or in the future. Because it works with a variety of graphics programs, including ones from ISSCO®, Precision Visuals, and Megatek.

Its 4010/4014 protocol enables you to draw complex images in bright, high-detail resolution.

You can quickly generate dotted, dashed, or solid vectors. Incremental point plots. Graphics text in four character sizes. With crosshair cursor capability. And "local" printer support.

With the RG512, we led the way to affordable graphics. Now, at $749, 512-Series sets the new standard for low-cost graphics.

Call today or clip and mail the coupon for full details from your local Retro-Graphics dealer.
