Orcandescent, Mr. Edison

Orcatech gives light to new ideas.

Young Thomas Edison always examined the practical aspects of each invention. His exploration of power systems, dynamos, switches and sockets transformed the incandescent lamp into one of the great design engineering achievements of the time.

Now you too can design from a total systems concept with your Orcatech Graphic Computer System. Powerful, high resolution, full color graphics at the speed of light. Fast pan and zoom. Dedicated power to transform your office into a practical invention factory.

Orcatech. For the great designers of our time.

Offices throughout the United States, Canada and Europe.
