introducing The Ridge 32. Mainframe Performance For Under $43,000.

A mainframe computer for under $43,000 is economical. A mainframe computer that networks, distributes resources and talks to the world is logical. The Ridge 32 is both. Everything you demand from the most expensive mainframes. Without the headaches. And at one-fifth the cost.

The Ridge 32 is a full 32-bit, UNIX™ System V based computer. A computer powerful enough for the simultaneous operation of as many as four high-resolution graphics terminals. But for under $43,000, it's practical for single users too. And you can expand, one Ridge 32 at a time, as your needs grow.

The Ridge 32 comes in a logical new package that gives you enormous computational power without the frustrations of timesharing. Or the costs of an air-conditioned room. And with Ethernet and a gateway you can access the world. All in a workstation suited for any office environment.

So give yourself power at an affordable price. Write Ridge Computers today: 2451 Mission College Boulevard, Santa Clara, CA 95054. Or call 408/986-8500. Make the economics of logic work for you.
