Choose Precision Visuals graphics software and you’re in the best company.

"DI-3000® graphics software will meet the needs of a total enterprise."
Phil Goss
Honeywell

Precision Visuals' graphics software tools are today's standard for over 800 organizations, large and small. Here's why. Your application developers will save hundreds of programming hours using our graphics subroutine libraries for all your applications from interactive computer-aided design, geological data analysis, process control, to business graphics. With over 70 intelligent device drivers running on most popular computers—IBM, DEC, CDC, PRIME, Honeywell, Data General, Cray, Apollo, and many UNIX-based systems*—your hardware and software investment is secure.

At companies like Honeywell, software is part of the total graphics communications process. Look into Precision Visuals today and see why.

"Precision Visuals' documentation is a model for the industry."
Dr. James D. Foley, President
Computer Graphics Consultants, Inc.

Here's someone who knows how a good manual should look. Dr. Foley, Professor of Electrical Engineering and Computer Science at George Washington University is co-author of Fundamentals of Interactive Computer Graphics. According to Dr. Foley, our DI-3000® manual is "ideal for people with little or no graphics experience." Our example-intensive documentation includes a quick reference guide for the experienced graphics programmer and step-by-step tutorials that quickly turn beginners into productive graphics programmers.

It's not surprising that many customers were sold on our graphics tools just by looking at our documentation. Ask to see a copy for yourself.

"It's not just the package that's important. It's the people behind it."
David Campbell
INCYTE, Fairchild/A Schlumberger Co.

What adds even more value to our versatile graphics tools is the support you get from our people at Precision Visuals. Graphics software specialists staff a Help Line for quick answers to keep you on schedule; national training programs, for the novice to the advanced graphics programmer, help get your applications operating on time and within budget; active international and regional user groups that exchange creative and productive ideas; plus thoroughly tested products and documentation designed to meet your needs today and in the future.
