Our VISUAL 500 and 550 graphics terminals emulate the Tektronix 4010/4014 in nearly every way, but one: Price. Ours costs less than half as much.

Our 768x585 high-resolution also gives you remarkably sharp text and graphics display. While our larger 14” screen makes viewing easier.

What’s more, both the VISUAL 500 and 550 are compatible with most standard software, including PLOT 10®, DISSPLA®, TELL-A-GRAP®, SAS/GRAPH, DI 3000/GRAFMAKER, INFOgraph, SPSS®, TEMPLATE™, “DR Graph,” “GSX™” and all GSS products.

And both terminals come with a wide variety of advanced graphics features. Resident vector draw. Point plot. Circle and arc draw. Rectangle draw. Multiple line styles and patterns with rectangle pattern fill. Plus an auxiliary port to support printer/plotters and data tablets.

As an alphanumeric terminal, the VISUAL 500 provides selectable emulations of the DEC VT52, Data General D200, Lear Siegler ADM-3A™ and Hazeltine 1500 terminals. While the VISUAL 550 is DEC VT100® protocol-compatible as well as a character or block mode terminal which complies to the ANSI X3.64 standard.

For complete information, call or write Visual Technology today. And find out how easy it is to get all the quality and features you want in a graphics terminal. Without paying all the price.
