The Shape Of Things To Come Is Here...

What makes our "Sexy Robot" unique is our uniqueness. We're a company that not only writes software, we use it to make all of our visual products.

Some companies would rather tell you about their future plans and philosophy. But the practical business of computer graphics isn't simply a matter of philosophy. It's a matter of experience, of making images that work, on schedule, in the real world.

Visit us at Siggraph and see the proof of our software in the pictures that we make.
