Directory of computer graphics suppliers updated

The fourth edition of *The S. Klein Directory of Computer Graphics Suppliers* is now available. It contains a listing of 550 vendors who specialize in supplying graphics-related hardware, software, systems and services, including CAD/CAM, business graphics, and imaging.

According to its publisher, the 204-page directory is targeted at users interested in high resolution and high performance applications in industry, business, education, and commerce. The listings contain essential company data, including telex and TWX numbers and the name of a contact person. There is a cross-referenced index of types of products and specific applications.

The directory identifies educational and training resources including organizations that publish market reports and technical studies and sponsor seminars, conferences and exhibitions. The fourth edition contains a new section that lists consultants who help prospective computer graphics customers to find the right products.

The directory is priced at $65. For more information contact S. Klein Directory care of Technology & Business Communications Inc., PO Box 915, Sudbury, MA 01776; (617) 443-4671.

Book examines CAD in architecture

*Pioneers of CAD in Architecture* contains the testimonials of 60 architects.

The contributors bought early, half-finished systems, learned to apply them, and then aided in the development of architecture-specific systems. The full-color, heavily illustrated 650-page volume includes their reports, pictures, drawings, descriptions, applications and advice. The price is $78.

For more information contact Hurland/Swenson Publishers, PO Box 583, Pacifica, CA 94044; (415) 359-0738.

**Shielded rooms with a roomful of benefits.**

**LECTROSHIELD®**

**Clamp-Together Rooms — Shielding Effectiveness to 100 dB+**

- 1.0 KHz to 10 GHz attenuation for MIL-STD-285, NSA 65,6, FCC and VDE testing, MIL-STD-461/2/3, etc.
- High reliability electrical and structural.
- Meets stringent building and safety codes, including Seismic Code Zone IV.
- Prefabricated, modular.
- 48 standard room sizes . . . 8' x 8' to 24' x 48' (interior), standard interior heights to 8', 10' and 12', plus custom sizes.
- Easily assembled and dismantled.
- High reliablity electrical and structural.
- Meets stringent building and safety codes, including Seismic Code Zone IV.

**All-Welded Rooms — Shielding Effectiveness to 120 dB-140 dB+**

- Meets TEMPEST and other secure requirements.
- Ideal for EMP hardening.
- Free standing; total structural and seam integrity.
- Patented sliding doors exceed MIL-STD 285 and NSA 65-5.
- MIG welding throughout.
- TEMPEST shielded security vaults.
- Standard and customized sizes.
- Maximum fire protection.
- Complete design and turn-key facilities.
- LMI has the shielding solution for you.

Write or call the LMI Application Engineering Department.
