Fundamental Algorithms for Computer Graphics
Edited by R. A. Earnshaw
This detailed and up-to-date volume reviews the principal developments in fundamental algorithms for computer graphics. Included are analyses of fundamental algorithms for picture element description, formulation and display, as well as discussions on surface drawing, scene generation, fractals, animation, CAD and human factors.
1985/240 pp./Hardcover $29.50
ISBN 0-387-13920-6 (Computer Science Workbench)

Computational Geometry
An Introduction
F.P. Preparata and M.I. Shamos
This book presents a comprehensive graduate text on computational geometry. Problems addressed include geometric searching and retrieval, convex hull construction and related problems, proximity, intersection, and the geometry of rectangles. This book will prove essential to researchers and professionals in the applied fields of computer-aided design, computer graphics, and robotics.
1983/542 pp./93 illus./Hardcover $39.00
ISBN 0-387-11525-0 (Symbolic Computation)

Computer Animation
Theory and Practice
N. Magnenat-Thalmann and D. Thalmann
This is the first book to attempt to present all aspects of computer animation. Various subjects are treated and the book is intended to be an introduction for designers and animators, a reference book for professionals in computer graphics as well as a manual for university teachers in computer graphics and computer animation.
1985/240 pp./156 illus. (54 in color)/Hardcover $29.50
ISBN 0-387-70005-6

Computer Graphics Programming
GKS—The Graphics Standard
G. Enderle, K. Kansy, and G. Pfaff
"Computer Graphics Programming is an important addition to the standard because it explains concepts, examples, and figures that could not be included in the standard document . . . indispensable to anyone wishing to understand and use GKS."
—J.L. Maggiore, BYTE, 2/85
1983/542 pp./93 illus./Hardcover $39.00
ISBN 0-387-11525-0 (Symbolic Computation)

The Visual Computer
International Journal of Computer Graphics
Springer's new journal reports the state-of-the-art in computer vision, graphics and imaging, with special focus on applications.
