provide new features and permit new automated systems.

But little is known about all the products available for the various kinds of work that need to be done, and that is the hole Diversified hopes to fill with its new Market Report on Scanning Products & Systems—1986.

The report is meant for both present and prospective users. Written by Diversified Data Resources, it covers such topics as a basic introduction to technology, company profiles, scanner products, systems, and software, data capture systems, and application information.

The report also takes a look at market trends, and comes with an update service. For further information contact Diversified Data Resources, 6609 Rosecroft Pl., Falls Church, VA 22043, or call (703) 237-0682.

**Pixar kicks up a lot of dust**

ScarceIy has the cookie been cut than it's out of the pan and running. Here is just some of what this fledgling company has been up to lately. Pixar has signed a remarketing agreement with Sperry Corporation so that Pixar's Image Computer will be the one working with Sperry in its seismic interpretation and defense mapping.

Pixar has also teamed up as an OEM with Alias Research of Toronto. Alias is a leading developer of high-performance three-dimensional modeling and rendering software for industrial design and animation. Alias will integrate the Pixar Image Computer into the ALIAS/1 computer design and animation station for use in the industrial design and video post-production markets.

Meanwhile, Ed Catmull and Alvy Ray Smith are going to move over and let Stanley L. Kiler take the position of director for sales. Before joining Pixar, Kiger was a national account manager with Evans & Sutherland.

**CLASSIFIED ADS**

**RATES:** $5.00 per line, $50 minimum charge (up to 10 lines). Average six typeset words per line, nine lines per column inch. Add $4 for box number. Send copy at least six weeks before month of publication to: Carole Porter, IEEE Computer Graphics and Applications, 10662 Los Vaqueros Circle, Los Alamitos, CA 90720.

**Notice**

To comply with the Age Discrimination in Employment Act and to discourage age discrimination, IEEE Computer Graphics and Applications may reject any advertisement containing such phrases as: "recent college grads," "1-4 years maximum experience," "young man/woman wanted," or any ad that refers to ages of desired applicants in any way. IEEE CG&A reserves the right to append to any advertisement, without specific notice to the advertiser, "Experience ranges are suggested minimum requirements, not maximums." IEEE CG&A assumes that, since advertisers have been notified of this policy in advance, they agree that any experience requirements, whether stated as ranges or otherwise, will be construed by the reader as minimum requirements only.

**UNIVERSITY OF BERNE, SWITZERLAND**

Institut für Informatik und angewandte Mathematik
(Dept. of Computer Science and Applied Mathematics)
The department invites applications for the following faculty positions beginning April 1987 or later.

**PROFESSOR OF COMPUTER SCIENCE.** The candidate's basic duties and responsibilities are in teaching and research in computer science, particularly within the subfields of computer architecture and operating systems. Furthermore, the duties include assisting other university departments in use and application of computer facilities. It is necessary, therefore, that applicants have experience in such kind of services as well as in the management of a computer center.
