FEATURE ARTICLES

10 Guest Editor's Introduction
Personal Computers
Carl Machover

13 Productivity Issues in PC-CAD Graphics
Tom Hall
Slowness in a PC-CAD graphics system affects productivity in a lot more ways than in the time lost while users wait for a system response.

17 Personal Computer Displays
Satish Gupta and Daniel H. McCabe
The evolution of display architectures for personal computers points out future trends in their development.

24 The Third Generation of PC Graphics Controllers
J. Michael James
By looking at the evolution of PC graphics controllers, we can see how the market meets the challenge of delivering the next available technology to the user.

28 PC Hardware Developments and CAD Software
Tom Lazear
No CAD software developer can afford to neglect the new developments in PC hardware and the benefits they offer to potential customers.

32 Peripheral Considerations for PC-CAD Users
Doyle K. Cavin
The choice of input and output devices often depends on striking a balance between price, user needs, and what is offered by the current technology.

39 A Call for the Publishing of Blt-Stones
Tom DeFanti, Rick Frankel, and Larry Leske
Illustrations by Maxine Brown
Direct high-level-language access to low-level graphics functions for personal computers and workstations could save programmers hundreds of hours of detective work.

50 The Usable Intersection of PC Graphics and NTSC Video Recording
Tom DeFanti and Don Sandin
This article discusses compatibility problems between nonstandard video on PCs and standard television equipment, detailing a case study of one system.
