Special Thanks to CG&A’s Reviewers

The *IEEE Computer Graphics and Applications* editorial board would like to take this opportunity to thank the many reviewers who helped make CG&A such a high-caliber magazine during 2007. Volunteer reviewers not only help us select the best articles, but they help authors improve them for publication. We appreciate our reviewers’ dedication to upholding the standards of our peer-review process and look forward to their contributions in the coming year.

James Abello, Rutgers Univ.

Discover a New World in Programming

Looking for a career with an innovative company where you can use your programming skills to make a difference in the world? Become a key technical member of ESRI’s development team and you’ll be designing and developing the next generation of our world-leading geographic information system (GIS) mapping software.

We are seeking software developers with solid core programming skills and a passion for inventing new technology. We have opportunities to work on everything from database and Web development to graphics, 2D/3D rendering, core server technology, cartography, and using Python to create applications, just to mention a few.

Our employees enjoy competitive salaries, exceptional benefits including 401(k) and profit sharing programs, tuition assistance, a café complete with Starbucks coffee bar, an on-site fitness center, and much more. We employ 4,000 people worldwide, 1,700 of whom are based at our Redlands headquarters, a community ideally located in Southern California. Join ESRI and be a part of changing the world.

Learn more about ESRI and apply online at www.esri.com/programmers.
