"Computers and the Quality of Life"

The 1971 Fall Joint Computer Conference will be held in Las Vegas, Nevada on November 15, 16, 17 and 18, 1971.

The scope of the conference will encompass the entire information processing field. However, the primary theme will be the use of computers to improve the quality of life. In particular, application papers are solicited for sessions relating to such topics as Urban Planning, Environmental Control, Education of the Disadvantaged, Planning for Change in Highly Industrialized Nations, Accelerating of the Progress of Emerging Nations and other problems of our world society. A prime objective is to stimulate interest which will lead to new developments and advances. Authors are invited to submit original papers in these application areas, and in system design and hardware/software technology.

AFIPS will award a plaque for the best paper of the conference, based on the technical importance and quality of the written papers.

Instructions to Authors

Only new unpublished papers may be submitted. The text should not exceed 6000 words. Include a 100-200 word abstract and a full set of illustrations keyed to the text. Obtain any necessary company approval before submission.

Manuscript must be typed, double spaced, one side of the paper only. On the first page give: title; full name of author(s) with co-authors in desired order; company or university affiliation of each author; name, address, and telephone number of the responsible author. Responsible author's name and page number must appear on each subsequent page.

Six copies of the draft manuscript, each complete with abstract, and illustrations (all of which will be retained) must be submitted. Please notify the Technical Program Chairman in advance of your intention to enter a paper.

**Paper Deadline April 1, 1971**
