FEATURES

5 A Standard Pattern for Sequential File Maintenance
by Norman D. Petersen
Exploring the use of ready-made logic in developing programs and a proposed standard approach to file maintenance.

10 Standards for Computer Networks
by Theodore H. Bonn
Suitable standards are a key to the full development of multi-access computer networks. The author examines progress (and the lack of it) to date, and offers some concrete proposals.

15 How the Fast-Fourier Transform Got Its Name
by T. S. Huang
The amazing (and improbable) story of the hitherto unknown origins of the FFT.

CONFERENCES AND MEETINGS
16 Design Automation Workshop
The full program of this popular workshop including hotel and meeting reservation forms.

39 1971 IEEE Computer Conference
26 Preview of the Spring Joint Computer Conference
28 International Conference on Pattern Recognition
29 Fault Detection and Diagnosis
25 Symposium on Fault-Tolerant Computing
25 Whither Teledisplay Control Standards?
30 Terminal-Oriented Systems
