A unique conference designed to bring together leaders in computer technology from both countries. The technical sessions will stress similarities and dissimilarities in approaches taken by people in processing problems. A major exhibit program will feature products and services from both countries. Post-conference technical tours will provide comprehensive coverage of such major Japanese computer manufacturing facilities as Fujitsu, Hitachi and Nippon Electric, Japan National Railways Computer Center, Nippon Telephone & Telegraph, Public Corporation Data Center and Systems Laboratory and the computerized television studios at Japan Broadcasting Corporation. To accommodate U.S. registrants, special low cost flights are planned; tours of Japan and the Far East are also available.

For registration, travel and/or exhibit information, contact: USA-Japan Computer Conference, c/o AFIPS Headquarters, 210 Summit Avenue, Montvale, N.J. 07645.
