ANNOUNCING

da major new publication
in the field of computer science

IEEE TRANSACTIONS ON
SOFTWARE ENGINEERING

to be published quarterly in 1975 by
the IEEE Computer Society

Inaugural Issue: Volume 1, Number 1—Spring 1975

Editor: Raymond T. Yeh
Chairman, Computer Sciences Department
University of Texas at Austin

Editorial Board
Barry Boehm, TRW Systems
James C. Browne, University of Texas
Thomas Cheatham, Harvard University
Yaohan Chu, University of Maryland
E. F. Codd, IBM
C. A. R. Hoare, Queen's University of Belfast
Jack Goldberg, Stanford Research Institute
Seymour Jeffrey, National Bureau of Standards
Donald Knuth, Stanford University
Harlan Mills, IBM
C. V. Ramamoorthy, University of California at Berkeley
Douglas Ross, Softech, Inc.
Dick Simmons, Texas A&M University
Robert Simmons, University of Texas
Maurice V. Wilkes, University of Cambridge
Niklous Wirth, Eidgenossische Technische Hochschule
William Wulf, Carnegie-Mellon University

Devoted to the engineering aspects of computer software, the new Transactions will present
state-of-the-art research papers in such specific areas as programming methodology, software
reliability, system performance evaluation, software development management, and
software development tools. Other areas covered will include hardware-software interface,
man-machine interaction, software development for minicomputers, and the use of
automatic programming.

Transactions on Software Engineering is a publication option available to members of the
IEEE Computer Society for $4 per year ($2 March through August). It is also available to
non-member subscribers, libraries, and other institutions for $24 per year.
