The Computer Company you can afford.  
(and understand.)

When we built the Altair 8800 Computer, a lot of people thought we were nuts.  
"You can't build a computer that'll sell for '439.00 in kit form and $621.00 
assembled',' they said. "Besides, who ever heard of a computer kit?"

Well, we did it.

Then they said, "It must be a toy."
It isn't.
As a matter of fact, the Altair is one super computer. Its 8-bit processor is capable of directly addressing 65K bytes of memory. The Altair can be connected to 256 input/output devices. It has over 200 machine instructions and a cycle time of 2 microseconds.

So you ask, "Why is the Altair so inexpensive?"
Simply put, we use the latest in LSI technology and we build Altairs by the bunches. (It's almost embarrassing. We've only been on the computer scene a short while, yet we're selling more computers and peripherals than many of our long-time, established competitors.)

And that's not all.

You see, we're quite serious about starting the computer revolution all over again. We foresee the day of the computer in every small business, every automobile and every home in the country. (It's a rather large market.)

That's why we're selling our Basic Language System for $2,461.00 (Fully assembled Altair Computer with 8K of memory, a serial interface, computer terminal and BASIC language software.)

We're selling our EXTENDED BASIC Language System for $2,806.00 (Altair with 12K of memory, serial interface, computer terminal and EXTENDED BASIC software.)

Our DOS EXTENDED BASIC Language System goes for $6,649.00 (Altair with 16K of memory, serial interface, computer terminal,disc controller and 2 disc drives, DOS and EXTENDED BASIC software.)

And that's why we're selling our Advanced Accounting/Engineering System for $10,489.00. (Altair with 32K of memory, serial interface, teletype [or terminal], line printer,disc controller and disc drives,DOS and EXTENDED BASIC software.)

Naturally, we've got dozens of other options. Our Altair Computer was designed for 1000's of existing and new applications.

So why don't you call us at 505/265-7553 or write to us at 6328 Linn NE, Albuquerque, NM 87108. Ask for one of our free Altair System Catalogues.

NOTE: Prices listed here are single quantity prices. OEM discounts are available.
