CALL FOR PAPERS

The conference will emphasize, but not be restricted to, the following major areas:

1. Programming Methodology
2. Testing and Validation of Software Systems
3. Performance and Design Evaluation of Software Systems
4. Data Base Design and Management
5. Software Development Management
6. Software Development Tools
7. Software for Mini- or Microcomputers
8. Software Engineering Education
9. Software Fault-Tolerance and Reliability Modeling
10. Distributed Processing and Networks

Authors are invited to share their experiences with practices and tools used in software development. Exemplary applications, practical guidelines, and theoretically based papers are welcome. Proposals for sessions are also welcome. Abstracts are due by March 1, 1976. Completed papers are due for review by April 15, 1976. Camera-ready copies of those papers selected will be required by July 1, 1976.

Submit abstracts and drafts to the program chairman, Dr. C. V. Ramamoorthy, Dept. of Electrical Engineering and Computer Sciences, UC Berkeley, Berkeley, CA 94720.

Executive Committee

General Chairman
Raymond T. Yeh, University of Texas at Austin
Program Chairman
C. V. Ramamoorthy, University of California at Berkeley
Conference Operation
Michael Galley, IBM, San Jose
Publicity
Pei Hsia, University of Alabama in Huntsville
H. Kopetz, Hauptstätung Linz, France
Harry Hayman, IEEE Computer Society
True Seaborn, IEEE Computer Society

Program Committee

Barry Boehm, TRW
James C. Browne, University of Texas at Austin
Jack Goldberg, SRI
C. A. R. Hoare, Queen's University, N. Ireland
David Hsiao, Ohio State University
L. Igarashi, Kyoto University, Japan
Butler Lampson, Xerox Research Lab
Leonard Liu, IBM Research
Zohar Manna, Weizmann Institute, Israel
Harlan Mills, IBM Federal Division
William McKeeman, University of California at Santa Cruz
C. V. Ramamoorthy, University of California at Berkeley
J. C. Rault, Thompson-CSF, France
Douglas Ross, SofTech
Thomas Steel, Equitable Life
H. Trauboth, W. Germany
William Wulf, Carnegie-Mellon
Raymond T. Yeh, University of Texas at Austin
Seymour Jeffery, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C.
