Now you see it, Now you don't.

A CRT image is like puppy love. Nice while it lasts, but over before you can enjoy it.

Sooner or later, someone will want permanent copy from your CRT. Perhaps he needs a waveform record for his log. Or a copy of a computer-generated design. Or a graph with alphanumerics for a report.

Produce that ready-to-read copy in just twelve seconds. Produce it at low operating cost with a machine that has an MTBF in excess of 3,000 hours, and a paper that costs one-fifth as much as dry silver paper.

The machine, a standard Versatec printer/plotter with a computer and a CRT controller, does a lot. Serves up to four CRTs. Doubles as an on-line computer printer/plotter with printing speeds up to 1000 lines per minute. Plots up to 2.4 inches per second. And it does all these jobs without impact. Quietly. Reliably. Economically.

You get a better CRT copy. High contrast graphics, produced by dual array electrostatic writing, are actually enhanced. You don't lose detailed information. And the copy is truly permanent. No fade or deterioration like silver paper.

If you have a Tektronix display terminal or other popular CRT, we can supply a complete output package designed for your system.

VERSATEC
Making information visible

Versatec
2005 Bowers Avenue
Santa Clara, CA 95051
(408) 988-2800

Send me complete information about the Versatec electrostatic printer/plotter that also makes hard copy from CRT displays.

My special interest:

☐ Permanent copy from CRT display
☐ Line printing
☐ Plotting
☐ Plotting software
