Big technology for Mini-computers.

The mini-computer market has grown to the point where it demands "3330" disk technology in a package that fits.

Introducing: The Trident Disk Drives.

Greater track density helped get us down to size. The new Trident Series brings you 370 tracks-per-inch. And up to 6,060 bits-per-inch. Storage capacities range from 27-82 megabytes.

Designed for the OEM.

The Tridents are each compact, self-contained and rack-mountable.

Their start or stop time is only 20 seconds. Pack changes take less than one minute. Rotational speed is 3600 r.p.m. Track access time is 6 milliseconds.

The Trident Series has one of the lowest cost-per-byte ratios in the industry.

These features make the Tridents easy to buy and easier to sell. Call or write California Computer Products, Inc., CM-M9-76 2411 West La Palma Avenue, Anaheim, California 92801. (714) 821-2011.
