THE ONLY DISK DRIVES THAT DON'T NEED CLEAN AIR TO BREATHE.

Each Trident disk drive has its own enclosed air filtration system. No other removable-pack disk drives do.

This means you can use a Trident just about anywhere. In a warehouse. Or a factory. Even in a smoke-filled room.

This kind of flexibility is just one reason Trident is the choice of growing businesses everywhere.

You find Tridents on the job in department stores—taking care of inventory control right at the point of sale.

Tridents are at the heart of the reservations systems for major hotel chains.

And Tridents are the continuing choice of the nation's leading OEMs.

NEW!
LARGE CAPACITY TRIDENTS.

Now there are two new large capacity Trident disk drives—the T-200 and T-300. They join the T-25, T-50 and T-80 to give you a wide range of capacities—all the way from 27 to 312 megabytes.

So now, as your needs grow, you have the capacity to meet those needs.

Each Trident model is functionally compatible with every other Trident model.

Each gives you track-following servo-technology. And each gives you one of the lowest cost-per-byte ratios in the industry.

A SOLUTION FOR YOUR PROBLEMS.

At CalComp we've been solving the data problems of growing businesses for years.

If your growing systems business needs more flexibility, and if you want the experience and expertise that only CalComp can give you, call or write:
