Workshop on
Operating and Database Management Systems

Second Call for Papers

The interface workshop in operating systems and database management systems, sponsored by IEEE Computer Society, originally scheduled for November, 1976, has been rescheduled. The workshop will be held March 21-22, 1977 at Northwestern University. Deadline for receipt of complete papers and abstracts for short talk is January 20, 1977. They should be mailed to

Professor David K. Hsiao
Dept. of Computer and Information Science
2036 Neil Avenue Mall
The Ohio State University
Columbus, Ohio 43210

The format of the workshop is as follows: Sessions will be organized to discuss major topics such as:

☐ Security, reliability and recovery in database systems and operating systems
☐ Improvements in operating system design to support database management systems
☐ Database machine design
☐ Distributed database systems

Submitted papers and abstracts should be relevant jointly to operating systems and database systems, but beyond this there are no restrictions on acceptable subject matter. Full-length papers which are accepted will be allocated 20 minutes for presentation plus time for discussion. Those submitting abstracts of talks will be allocated about 10 minutes for presentation plus time for discussion. Both papers and abstracts will be reviewed for acceptability by the program committee. Notifications of acceptance will be sent in early February. Each full-length paper will be considered for publication in IEEE-TSE or ACM TODS. Abstracts will be distributed at the workshop.
