pick our brains

TECHNOLOGY TRANSFER—MORE THAN EDUCATION

- The world's most advanced technology in computers and communications.
- Challenging and dynamic seminars by the world's most famous authorities.

Although these seminars appeal to a wide spectrum of technical, managerial and scientific audiences, T.T.I.'s seminars are not for everyone.

If you are involved in challenging and complex system design...

If you are prepared to accept the advances brought about by changing technology...

If you demand excellence in the field of teleprocessing...

If you need help in reducing complex advanced developments to real world applications...

Then you need these authoritative courses.
