THE ONLY DISK DRIVES THAT DON'T NEED CLEAN AIR TO BREATHE.

Each Trident disk drive has its own enclosed air filtration system. No other removable-pack disk drives do. This means you can use a Trident just about anywhere. In a warehouse. Or a factory. Even in a smoke-filled room.

This kind of flexibility is just one reason Trident is the choice of growing businesses everywhere. You find Tridents on the job in department stores—taking care of inventory control right at the point of sale.

Tridents are at the heart of the reservations systems for major hotel chains.

And Tridents are the continuing choice of the nation's leading OEMs. There are five Trident models. So you have a wide range of capacities to choose from—all the way from 27 to 312 megabytes.

Each Trident model is functionally compatible with every other Trident model. Each gives you track-following servo-technology. And each gives you one of the lowest cost-per-byte ratios in the industry.

TRIDENT FORMATTER

Our 1150A Formatter is very versatile too. It offers the designer of micro/minicomputer systems important features that up to now were available only in large disk controller subsystems—such as ECC, RPS, and overlapped seek.

It can control and format any mix up to eight Trident drives—for a total storage capacity of up to 2.4 billion bytes of on-line data. And it can be attached to virtually any micro/minicomputer by means of a universal CPU interface.

A SOLUTION FOR YOUR PROBLEMS.

At CalComp we've been solving the data problems of growing businesses for years.
