PROGRAMMER/ASSEMBLER

A programmer with a minimum of 2 years of assembler experience, who aims at extending his or her professional capabilities in a high challenge environment, should check out RJR’s opportunities for several reasons.

- One is diversity. As a Fortune 500 corporation, RJR is heavily involved in many growth industries, including food, tobacco, metals, transportation, packaging and petroleum.

- Another is our commitment to maximizing the ways in which our computer facilities can be utilized, which means multiple applications ranging from marketing to process control to warehousing, using 370/158's and 145's.

- And the value we place on EDP skill is demonstrated by the salary structure in this area and the excellent benefits package that accompanies this. We are situated in one of the most attractive living areas on the East Coast.

Planned growth is creating new openings for assembler programmers with experience in on-line programming, a working knowledge of DOS and/or OS, and the respective control language. A degree or comparable experience is desired.

If you qualify, we'll be pleased to talk with you. Write, in confidence, including resume and salary requirements, to: Mr. Denis P. Simon, Manager of Employment, R.J. Reynolds Industries, Inc., 401 North Main Street, Winston-Salem, North Carolina 27102
