A lot of things have changed at Amdahl since we first began. Six years ago, we set out to design and build a new generation of large computers. Today, that goal is a reality. At that time, the company was virtually unknown. Today, we are one of the most talked about companies in the computer industry. A year ago, we were less than 400 people. Today, we're more than double that.

But some things haven't changed. Like the exciting and challenging environment. Like our excellent compensation and benefits package. Like our friendliness, regard for human feelings, and the sense of involvement that have characterized the company since we began. And we're still growing. Which is why we need help, from the same kind of competent, enthusiastic individuals who helped make us the exceptional company that we are today.

**COMPUTER SYSTEMS ARCHITECT**

Our Systems Architecture group is looking for talented professionals to help design future high-performance computer systems. You should have a broad educational background in EE or CS with emphasis on computer architecture or design and be familiar with most of these areas: computer systems organization; storage systems organization; operating systems theory; assembler/high-level languages; data base fundamentals. Combined hardware and software experience and familiarity with System 370 is desirable.

We have immediate openings for the following positions.

**SENIOR SYSTEMS ARCHITECT**

You will be a key decision maker on an architectural team. You have experience in either computer systems architecture, design, operating systems or data base systems design.

**STORAGE SYSTEMS ARCHITECT**

You will be key in defining the architecture of future storage and data base sub-systems. You have experience in either of these areas.

**SYSTEM PERFORMANCE ARCHITECT**

You will be the performance specialist on an architectural team. You have extensive experience in computer system performance measurement, evaluation, and modeling with emphasis on architecture.

**SOFTWARE SYSTEMS ARCHITECT**

You will be a software systems specialist on an architectural team. You have an architectural orientation and experience with operating systems/data base, preferably on System 370.

**SYSTEMS ARCHITECT**

You will be a member of an architectural team working on diverse investigations. This position offers tremendous educational and advancement opportunities. You have at least 2 years' related experience.

**COMPUTER PERFORMANCE MEASUREMENT/EVALUATION ENGINEERS**

Amdahl is looking for Performance Measurement and Evaluation Engineers to support architecture and design of future systems.

**PERFORMANCE MEASUREMENT ENGINEER**

You will be responsible for a continuing performance measurement and analysis project on various systems and workloads. You have extensive measurement experience with hardware and software measurement tools, preferably on System 370.

**PERFORMANCE EVALUATION ENGINEER**

You will be responsible for application of analytical and simulation models for evaluation of architecture or design alternatives. Hopefully you have at least 2 years' related experience.

We're looking for exceptional talent. You can expect an exceptional compensation and benefits package. Please direct your response to Manager, Professional Employment, Amdahl Corporation, 1250 East Arques Avenue, Sunnyvale, CA 94086. To expedite your application, please indicate 416-TT on your resume or letter. We are, of course, an equal opportunity employer.
