

Very Large Data Bases

CALL FOR PAPERS

FOURTH INTERNATIONAL CONFERENCE ON VERY LARGE DATA BASES

BERLIN, GERMANY

SEPTEMBER 13-15, 1978

THIS conference is the fourth in a series. Like its predecessor, the conference is intended to identify areas of general interest for research, development, and applications of data base systems. Its objectives are to promote an understanding of current undertakings, to further the exchange of experience gained in the construction and use of data base systems, and to serve as a forum for future research and development. We are especially interested in high quality papers in the areas of data base design, data base software engineering, distributed data base systems, and the impact of new technologies.

TOPICS OF INTEREST

Suitable topics include, but are not limited to:

DATA BASE DESIGN

system analysis
requirement specification
logical data base design and integration

DATA BASE SOFTWARE ENGINEERING

formal specification
design methodology
development tools
verification

DISTRIBUTED DATA BASES

network architecture
resource management
program conversion
data migration

DATA BASE COMPUTER ARCHITECTURE

back-end machines
microprocessors
memory organization
storage technologies

CONFERENCE WEEK IN BERLIN

The VLDB conference has been scheduled to coincide with the International Congress of Data Processing. As a result it can be expected that many practitioners will attend the VLDB conference. Thus practically oriented survey and tutorial papers are especially welcome. Intensive debates among practitioners and researchers will be organized.
