EXCELLENCE PAYS OFF

We are a rapidly growing international organization active in the development and application of new systems and software technology. In only eight years we have built a reputation for excellence in serving major corporations and the Government. We are proud of the continuity of our staff and the national reputation of our key technical people. We have a few openings for entry level and senior level professionals in the following areas:

COMPILER DESIGN
Previous compiler design experience is required. Candidates must have a working knowledge of systems programming, language processors and high level languages such as PL/1, JOVIAL, ALGOL and PASCAL.

SOFTWARE TOOLS IMPLEMENTATION
To support the design and implementation of microprocessor development tools. These tools will form a software engineering facility hosted on the PDP-11, under the UNIX operating system and targeted initially for the 8080 microprocessor. Experience with UNIX or microprocessor software development, especially for real-time systems, is desirable.

SYSTEMS ANALYSIS
Using SofTech's Structured Analysis and Design Technique (SADT®) on diverse applications, including software, hardware, manufacturing and financial systems. A background in data processing, operations research, and/or management science is required, as are strong conceptual skills and consulting experience.

MIS DEVELOPMENT
Involves development of large-scale, data-based systems for management, with novel user, design and implementation features. Experience with data base management systems, especially on machines such as PDP-11/70, is desirable. We are actively using techniques such as structured programming and top-down design and testing. Relevant experience would be an asset.

Opportunities exist in Boston, Washington, D.C., Dayton and San Diego.

We offer the opportunities for professional growth inherent in a 125 person environment, coupled with excellent starting salaries and outstanding benefits. Please write to Sally Jablon Silver, SofTech, Inc., 460 Totten Pond Road, Waltham, Massachusetts 02154. Telephone (617)890-6900.
