**General Dynamics Data Systems Services introduces the Career Registry.**

We have created this new registration service for DP professionals who are too busy to actively search for important opportunities. It will enable us to notify you of our immediate openings in your specialty, and also keep you informed of appropriate future openings throughout the year. Qualifications must include a professional degree in Computer Science, Math, Physics, Engineering or Business with a minimum of 2 years experience.

**Here's How It Works:**

We have listed our principal areas of DP involvement—hardware, software, applications programming and, of course, our widespread geographical locations. All you need to do is to use the scale provided to mark the spaces that best match your qualifications. We, in turn, will notify you of our present and future openings that fit your Career Registry profile.
