ONLY COMPUTALKER GIVES YOU THE CHOICE

No other speech synthesizer available offers you the flexibility of the Computalker Model CT-1. The parameter editor program, CTEDIT, allows direct manipulation of all 9 control parameters. CTEDIT and parameter data tapes are furnished with the CT-1 synthesizer board.

The optional CSR1 software package translates ASCII phonetic text strings to speech output. CSR1 is simple to use and is the easiest way to create new speech. CSR1 can also be called as a subroutine from user's code for applications involving program controlled voice output.

The CSR1 phonetic rule system generates control parameters in the same form as used by CTEDIT. Thus, it is possible to further edit the output of the rule system, to achieve natural sounding speech output with minimum effort.
