THEME FEATURES

6 Computers and the Humanities
Guest Editors Paul Bratley and Serge Lusignan

8 Computation in History: Styles and Methods
David Herlihy
Recent advances in interactive computing and file management systems help the historian fulfill his traditional function as a collector, critic, and interpreter of documents.

19 The Computer in Choreography
John Lansdown
Computer-aided choreography illustrates some basic relationships between the computer artist and the computer procedures he employs to achieve certain artistic outcomes.

32 Computer-Aided Study of Literary Language
Donald Ross, Jr.
Work in artificial intelligence and the speed and flexibility of electronic storage offer potential solutions to the special problems encountered in describing the language of literature.

40 Computer Music Composition: The Polyphonic POD System
Barry Truax
A computer music system allows the composer to work with musical structure in a highly controllable and predictive way, and enables him to compose, modify, and synthesize an expanded range of musical expression.

SPECIAL FEATURES

54 Developments and Directions in Computer Architecture
G. Jack Lipovski and Keith L. Doty
The microprocessor revolution is impacting von Neumann computer organization, as well as parallel and distributed processing. Herewith a perspective on where we are and where we are going in computer architecture.

68 Studying the Oceans from Space
Ware Myers
Three high-speed data streams from a new ocean-monitoring satellite are computer-processed on the ground into meaningful geophysical and meteorological information.

76 Open Channel: The Zero Law of Debugging or Structured Programming—How Far Structured?
G. Samid

DEPARTMENTS

3 Special Messages
78 New Products
82 New Literature
83 IC Announcements
84 Microsystems Announcements
