THEME FEATURES

Cover Design: Frank Yanai

7 Guest Editor's Introduction: Back-End Storage Networks

Harvey A. Freeman

The shared storage will be essential to the success of the large, multiple-host data-base systems of the 1980's.

10 Back-End Network Approaches

James E. Thornton

This review of existing back-end networks emphasizes the relationship of their storage aspects to the more general concept of local computer networks.

18 Performance Issues in Back-End Storage Networks

Imrich Chlamtac, W. R. Franta, P. C. Patton, and Bill Wells

A back-end storage network allows heterogeneous mainframes and devices to share resources, unhampered by hardware compatibility requirements. This flexibility has implications for the network's performance.

32 Network Architecture Design for Back-End Storage Networks

Richard W. Watson

To realize the full potential of computer networking, design of a back-end storage network architecture should follow the general-purpose approach of an evolving network operating system.

50 Back-End Technology Trends

George A. Champine

Rapid decreases in hardware costs, increases in economy of scale, and improvements in functionality are accelerating the move to back-end systems.

SPECIAL FEATURES

59 CMOS LSI—The Computer Component Process of the 80's

Donald L. Wollesen

Heat dissipation, or the "thermal barrier," is a problem that circuit designers have faced for years. The answer in the 1980's may be CMOS.

69 An Easy-to-Use Graph Drawing Package

Judy Butland and S. D. Butland

With suitable software, some graphics applications can be brought within reach of general computer users who have specific graphical requirements. One such package is SIMPLEPLOT.

81 Open Channel: Prototype Programs *W. P. Dodd*

DEPARTMENTS

- 5 Special Message
- 82 New Products
- 88 IC Announcements
- 89 Microsystems Announcements
- 90 New Applications
- 93 Update: *Call for Nominees*
- 99 Classified Ads
- 104 Call for Papers

- 108 Calendar
- 111 Book Review: *Compiler Construction: Theory and Practice*
- 112 Advertisers/Product Index
- 113 The Bookshelf

Coming Next Month:
Fault-Tolerant Computing

Reader Service Cards, p. 112A;
Order Form, p. A2.
