CALL FOR PAPERS
1981 International Symposium on Fault-Tolerant Computing
FTCS-11

JUNE 24-26 1981
Holiday Inn • Downtown, Portland, Maine
Enjoy Old Port Exchange Renovation Casco Bay Cruise
New England Clam Bake

This is the eleventh annual international symposium sponsored by the Technical
Committee on Fault-Tolerant Computing of the IEEE Computer Society.
Papers are solicited on any subject in the general area of fault-tolerant computing
including, but not exclusively limited to:

Fault Tolerant/Reliable
• Architecture-Distributed Systems/Multiprocessors
• Software-Programs/Data Structures/Systems
• Communications/Networks/Synchronization
• Existing Systems/Applications

Fault Tolerance/Reliability
• Theory/Validation
• Design Technology/VLSI Ramifications
• Modeling and Evaluation/Performance Considerations

Coding, Error Detection, Recovery
Testing, Diagnosis, Fault Modeling

IN ADDITION: • Special Session-Progress on Continuing Projects/Running Systems
Abstracts Only — Short Presentations

Four copies of an abstract (200 words maximum) should be sent to the Program
Chairman to be received no later than November 1, 1980.

Four copies of a complete paper of maximum length of 4000 words should be sent
to the Program Chairman to be received no later than December 1, 1980.

Authors will be notified of the disposition of their papers by March 9, 1981.

Program Chairman:
Jacob A. Abraham
Coordinated Science Laboratory
University of Illinois
Urbana, Illinois 61801
217-333-3378

General Chairman:
William C. Carter
IBM Thomas J. Watson Research Center
P.O. Box 218
Yorktown Heights, New York 10598
914-945-1092

Sponsored by IEEE Computer Society
