Frederic Lamond, TTI's seminar leader for the IBM 4300 Series Seminar, gives you an objective explanation and appraisal of this radical departure in hardware and software design.

IBM has gone out of its way to play down the fundamental changes heralded by the 4300 Series. Mr. Lamond's investigative presentation shows you the real depth of the changes, the importance to all DP users, and the possible impact on the entire DP industry.

IS THE 4300 SERIES FOR YOU?

What is the real story on the 4300 Series? What are its strengths and weaknesses? How can it best be used — both on its own and alongside other hardware? What are the alternatives — both from IBM and other manufacturers? How does the 4300 compare with the competition?

This timely seminar is an important continuing education experience for all senior DP personnel — even those who are not presently using IBM equipment. Coming industry changes caused by the 4300 Series breakthroughs will affect all DP design within the decade.
