

At General Electric we're using computers in ways no one thought of before.

Creating new applications of technology.

Applying it to GE products, businesses, operations and services.

Few other corporations are involved in programs of such breadth and diversity.

Our commitment to computerization has already made GE one of the world's largest users of computer technology. And this commitment continues to expand.

The computerization of GE has scored notable successes in a wide range of areas:

medical care... transportation... aircraft engines... spacecraft... electronic controls... process automation... mobile communications... energy... computer aided design and manufacturing... automated assembly... industrial robots... information processing... financial services... optical scanning... automated testing equipment
... and this barely hints at our scope.

CAREER OPPORTUNITIES

at many U.S. locations are steadily being created for degreed computer hardware and software professionals with virtually every type of experience.

Access these now. Send one resume to:

Roger T. Sobkowiak, Manager
Computer Manpower Development
