Communicate with Color Hard Copy from the 630 Series

Exciting computer images, digitally processed or original graphics, should not be confined to your color terminal. Their communication value is wasted. That's why Dunn Instruments invented versatile, affordable photographic hard copy. Made by the 630 Color Camera Series. Since early 1979, 630 Series cameras have been at work in applications ranging from remote sensing to animation, from business presentation graphics to NASA's Saturn mission.

Media versatility
Instant 8x10 prints on Polaroid® Type 808 film, overhead transparencies, 35mm slides, animated 16mm film—all these and more are within the capabilities of a single camera system. Their incredible resolution, chromatic vividness and accuracy will astonish you. So, too, will the speed, ease and assurance with which you produce them, thanks to microprocessor-automated camera operation and exposure control.

Multi-imaging power
Recording images side by side aids in comparative analysis and presentation planning. It also reduces film cost. Our software-based format selection means the freedom to tailor the configuration of images to your needs. It's a Dunn Instruments exclusive.

Interfacing ease
The 630 Series interface with ease to every kind of computer system and color terminal. They are sold complete, and installed worldwide by an experienced sales and service force.

Call 415/957-1600 and we'll put you in touch with your nearest Dunn Instruments representative. Or write us at 544 Second Street, P.O. Box 77172, San Francisco, CA 94107.
