CALL FOR ABSTRACTS
1982 ACM COMPUTER SCIENCE CONFERENCE

February 9-11
Indianapolis
Hyatt
Regency
Hotel

COMPUTER SCIENCE CONFERENCE
The 1982 ACM Computer Science Conference will be held Tuesday, February 9 through Thursday, February 11 at the Hyatt Regency Hotel, Indianapolis, Indiana.

Featured at CSC will be invited state-of-the-art-papers, and short submitted reports on current research by students, faculty, and researchers in the computer and information sciences. Abstracts only are required and the deadline for them to be submitted is December 1, 1981.

Other Events:
ACM National Student Programming Contest
Employment Register
Book and Instructional Computing Exhibits
Department Chairpersons' Luncheon
ACM/SIGCSE Technical Symposium
SIGNUM Forsythe Lecture

1982 February 9-11

SIGCSE TECHNICAL SYMPOSIUM
The Technical Symposium on Computer Science Education of the ACM Special Interest Group on Computer Science Education (SIGCSE) will be held on February 11 and 12 in conjunction with the 1982 ACM CSC. Papers due November 1, 1981.

1982 February 11-12

CONTACT: John Dalphin
IU-PUI Fort Wayne
Fort Wayne, Indiana 46805
Instructions for abstract preparation...

The printed program will be prepared directly from the abstracts submitted, so abstracts should be in camera-ready form and must be prepared exactly as described in the Sample Abstract. The abstract limitations permit about 200 words. Please use the ACM Computing Review category numbers (May 1979 revision) and also list the major key words in order of importance on the left-hand margin of the abstract. These must be included for scheduling purposes. Send original and two copies of the abstract to the address shown below by December 1, 1981. An attempt will be made to schedule all appropriate papers. A copy of the program schedule will be sent to the authors in mid-January. Authors are expected to be present at the Conference to make a 12-minute presentation.

Format for abstracts and other information

<table>

|                                                            | Preparation of Abstracts for the 1982 Computer Science Conference. IMA ALGORITHM, Midwest University—The abstract should be typed as one paragraph using elite or pica type, single-spaced, on one side of a good quality 21 cm x 28 cm size white paper using a carbon ribbon in a column 12.0 cm wide but not more than 10.5 cm long. As a typing guide, an outline of the 12 cm x 10.5 cm rectangle may be drawn in a very light blue pencil. This space may be used for tables, equations, line drawings, etc., and must include the title, authors, abstract, and footnotes. Do not indent the first line. Begin with the title and use a capital letter to start each significant word. Underline the title. Continue with the name of the author, in all capital letters, followed by the name of his/her institution, underlined, with initial capital letters. Next comes a dash, followed by the text of the abstract. Skip one line between the body of the abstract and the footnotes. This abstract is an example of this style. Bibliographic references and acknowledgement of research support should be included in the footnotes as shown below.
